## ***More Recognition for SAT Concessions Concessions Program at San Antonio International Airport Once Again Earns International Award***

Airport Council International-North America has once again recognized San Antonio International Airport (SAT) for having a superior concessions program. The announcement was made during the ACI-NA Airport Concessions Conference in San Francisco, California. San Antonio received a first-place award in the category of **“Best Food and Beverage Program”** and a second-place award in the category of **“Best Retail/Specialty Program.”**

The recognition from ACI-NA is the latest in a string of awards for the concessions program at SAT. Earlier this year Airport Revenue News, the industry's leading trade magazine, honored SAT with four separate awards, including “Best Overall Concessions Program.” It was the second year in a row that San Antonio International had taken home A.R.N.'s top award.

All of the recognition, from both ACI-NA and ARN, are a direct result of the planning and commitment which went into the Terminal Renovations and Concession Redevelopment Program. Finished in 2003, the program added 10,000 square feet of concession space, brought in a new food court area and did it all while incorporating a distinct South Texas flavor. It's a program that continues to place San Antonio International Airport at the forefront of customer satisfaction in the concessions area and the latest award from ACI-NA is further evidence of that fact.
